

## HEALTH INSURANCE AGENTS & BROKERS

# WHERE WOULD YOU BE WITHOUT NAHU?

### With NAHU representing the industry, policymakers have addressed several broker issues raised in health reform implementation, including:

- Allowing health insurance agents and brokers to sell private coverage both inside and outside of the new exchanges.
- Preserving private insurance plans as the predominant source of coverage, without the creation of a government-run public health insurance plan.
- Working with the National Association of Insurance Commissioners (NAIC) and policymakers to acknowledge the value of our members and the need to preserve your role in the health insurance system.

### With NAHU working with key policymakers, your dues dollars continue to support our role as the voice of the industry:

- Participating on NAIC subcommittees developing documents to help assist state departments of insurance with consumer inquiries regarding health care exchanges.
- Providing testimony before several NAIC subcommittees regarding the role of agents, the need to regulate navigators and the state of health care exchanges.
- Providing guidance to commissioners submitting comments on the Exchange and Insurance Market Standards for 2015 and Beyond federal rule regarding MLR and the regulation of navigators.
- Working closely with Congress and the Administration to address ongoing problems with the health reform law specifically pertaining to the role of health insurance agents and brokers, the preservation of the private and employer based health insurance system and the ongoing development of the health insurance exchanges.
